

Now Available from Resource Training & Solutions: Online Safety Training

Why Online Training? Keeping staff up-to-date on all health and safety training requirements can be challenging. Scheduling and training costs are the biggest factors in keeping certifications current and meeting OSHA expectations. Frequently OSHA requires that safety training be done before starting work or within a matter of days thereafter. The timely online delivery of training will satisfy these requirements for new hires and when an on-site trainer is cost prohibited for a small number of staff. To address these factors, Resource Training & Solutions partnered with Element K to bring our members online safety training at a great price!

We have worked with Element K for over 7 years providing software training (a long time in the learning industry!). Now we have expanded our offering to Safety training for our city, county and other non-governmental agencies. This program provides great pricing and local contact, along with the convenience of online learning. With a broad list of 49 Safety courses, you can choose a 1 course package, 3 course package, 5 course package, or a package of all 49 courses.

Health & Safety: 49 Courses, 42 Topics

- Asbestos Hazard Awareness (Refresher)
- Basic First Aid
- Basic Respiratory Protection
- Bloodborne Pathogens
- Cardiopulmonary Resuscitation (CPR)
