

Education Online

“TELL ME MORE® does it all! The software provides a new perspective to language learning through interactively reinforcing all of the content areas necessary to learn a language.”

*Kathy Natalizio
Curriculum Supervisor,
East Windsor Regional
School District*

TELL ME MORE® Education Online Customizable language learning

Specially designed for the K-12 education market, TELL ME MORE® Education Online offers students and teachers the perfect language learning solution. The dynamic content can easily be customized to align with your in-class lesson plans and curriculum.

With the included teacher tools, instructors remain in full control of the entire learning process, while students are fully immersed in the target language. Enjoy instant access to in-class tools to enhance the overall learning process. Audio visual aids, texts, and handouts can be accessed directly from within the system with a simple click of the mouse!

Focusing on all areas of language learning Proven instructional design - advanced technology

Combining the proven instructional design of the communicative approach with state-of-the-art technology, TELL ME MORE® Education Online allows students to achieve the highest possible proficiency levels. Focusing on all areas of language learning - Speaking, Comprehension, Reading, Writing, TELL ME MORE® Education Online exposes each student to the target language in the same environment as when learning one's native tongue.

The Education Online program includes:

- 2,000 hours of content per language
- Instant access to teaching aides
- 37 different types of activities
- Anytime and anywhere access
- Advanced student tracking
- Tutor and teacher tracking tools
- Fully customizable learning paths
- 3-D animations and videos
- Accessible anytime and anywhere
- Placement and Progress tests
- Preparation for TOEIC® certification exam

With twice the amount of content than the leading competitor and five times the number of activities, TELL ME MORE® is the best choice for your language learning needs. In the classroom, the language lab, or for homework assignments, TELL ME MORE® Education Online offers you a whole new dimension of teaching possibilities.

Each TELL ME MORE® solution is equipped with:

- Advanced speech recognition
- Additional business and cultural workshops
- Interactive speaking and listening workshops
- Interactive reading and writing activities
- Grammar rules classified by level
- 10,000+ vocabulary words
- Printable teaching aids
- Detailed reports sent to learners

The TELL ME MORE® Education Online solution is available in 6 languages:

- ESL
- Spanish
- French
- German
- Italian
- Dutch

Speech Recognition in Language Learning Technology

1. To be effective, a speech recognition engine should give intelligent feedback at the phoneme, word, and sentence levels. TELL ME MORE® is the **only** program in the world to accomplish this, with its **S.E.T.S**® technology (Spoken Error Tracking System).
2. Pedagogically, learners should have **immediate access** to an **objective scoring system** that can be adapted to learner aptitude.
3. Sound quality and recording performance should **seamlessly integrate** with the intelligent feedback mechanism of the software.
4. The pattern of speech being modeled should come from **varied voices** to allow for maximum dialect mastery.
5. The mechanics of proper speech should be **clearly** and **interactively showcased**.

Language Mastery. Don't Settle for Less

About TELL ME MORE, by Auralog

Auralog incorporates over 20 years of language empowerment experience, full training support services and advanced technologies including speech recognition, video, role play and spoken language tracking into the TELL ME MORE® suite of language learning software programs. With offices in United-States, France, Germany, Italy, Spain, Mexico, and China, Auralog has more than 350 employees and provides services globally to more than 10,000 organizations and over 7 million learners. Users of TELL ME MORE® include primary, secondary, higher and adult education institutions, home school, libraries, individual consumers, and businesses of all sizes.
